EDUCATION

Nashville Software School
FULL STACK SOFTWARE DEVELOPMENT CERTIFICATE

- Intensive 6-month bootcamp with a focus on building full-stack applications using React, ADO. NET & SQL.
- Developed a deep understanding of software architecture and problem-solving techniques.
- Gained proficiency in a range of technologies including .NET Framework, SQL, React, C#, HTML, CSS, and JavaScript.

School of the Art Institute of Chicago
BACHELOR OF FINE ARTS

- MAJOR: Film, Video, New Media & Animation
- MINOR: Visual Communications
- Deans List & Goldman Sach's Scholarship Recipient

PROJECTS

COOKIJAR is a a point-based task tracking application with user-defined rewards built with React using JSON server.

- This application allows users to define their own rewards and point system for completing tasks.
- When the user creates a new tasks, they are prompted to select a set amount of points to be rewarded once that task is marked as complete. The user can then view their tasks and mark them as complete, which will add the points to their total.
- Once the user has accumulated enough points, they can redeem them for a reward of their choosing.
